PREDICTED IMPLICATIONS OF THE PREFERRED PLAN

Policy Unit		Theme				
		Property & Land Use	Nature Conservation	Landscape	Historic Environment	Amenity & Recreational Use
4.1	Undefended cliffs	Generally no adverse impacts on property or land use.	Natural processes maintained under preferred plan, value of the SSSI and SAC designations upheld.	Continued no active intervention approach would help to maintain landscape value and uphold the AONB and Heritage Coast designations.	There are no historic sites impacted by the very low rates of erosion anticipated for this frontage other than potential erosion impacts at Polridmouth Cove.	Potential re-routing of coast path required at Polridmouth in the longer term.
4.2	Polruan	Preferred plan will help to maintain community and manage risks from erosion and flooding. No loss of property would be anticipated.	Impacts should generally be neutral.	The existing AONB and Heritage Coast designations would not be compromised under the preferred plan.	Protection of many listed buildings and the wider Polruan Conservation Area, including the Harbour, would be achieved under the preferred plan.	Recreational and amenity opportunities resulting from the presence of the Harbour and quaysides would be maintained under the preferred plan.
4.3	Fowey	Preferred plan will help to maintain community and manage risks from erosion and flooding. No loss of property would be anticipated.	Impacts should generally be neutral.	The existing AONB and Heritage Coast designations would not be compromised under the preferred plan.	Protection of many listed buildings and the wider Fowey Conservation Area, including the Harbour, would be achieved under the preferred plan.	Recreational and amenity opportunities resulting from the presence of the Harbour and quaysides would be maintained under the preferred plan.
